Professional Journey

Post Graduation I worked for 4 years & later started my Business in Manufacturing of Commercial Refrigeration Equipments under the Brand name 'HONEYDEW' in Mumbai

Family

My Wife, Mala and I have two Son. Our Elder son, Rahul is married to Preeti and Our Younger son, Rohit is married to Raksha. Both our Son are actively involved in our Family Business. We are also Blessed with a loverly Granddaughter and Grandson, Kiara and Aarav.

A Memory from College Days

I was an active Badminton Player during my College days and had the opportunity to Win several matches for my College. I also fondly remember the wonderful group of college friends I had. We often met in the city and spent Quality time together, especially at the Indian Coffee House. Those carefree days, the friendship we shared and many memorable conversations over coffee remain some of my happiest college memory.

Professional Journey

I started my carrier with Premier Automobiles Ltd. and then Jyoti Ltd. for very brief periods and then joined Bharat Petroleum Corp. Ltd. (BPCL) where I worked till retirement. Ours was the first batch after nationalization. The scenario was very difficult. Earlier crude was very cheap, leading to all the consumers becoming very lax on efficiency and lagging in proper usage of petroleum products. When OPEC was formed it gave shock to all the countries by forcing crude oil prices to increase 10 to 11 times. This led to throwing India in balance of payment crises. After joining we were given training and attached to a group formed by ministry named Petroleum Consumption Action Group (later known as PCRA). our task of how to increase efficiency of petroleum product consumption at the customer end. We carried out studies at all the large and medium industry and suggested ways to conserve petroleum products. Films, leaflets, posters and films were prepared, and seminars were conducted to create awareness among consumers.

Oil industry jobs are quite strenuous and involving. We are also frequently transferred from one place to another. I've worked in sales, customers service, safety audit, surveys at customer places for proper use and conservation of petroleum products. When I was posted at headquarters I was given all India upgradation of vehicle service stations at our petrol pumps. Which I was able to achieve at large number of locations. When I was in charge of lubricants at various locations, I was able to achieve very good sales performance against local and multinational enterprises. In my last posting I was assigned all India coordination of environmental projects. This included projects to enhance efficiency in all our activities including refinery, installations, depots and offices. We arranged third party audits of our activities. These were then becoming part of our Sustainability reports prepared every year. Then it is submitted for board approval to putting on the BPCL site for shareholders' and public view.

Family

Oil company job was so involving that I was not able to give time to household jobs and contribute for children's growth. I give entire credit to my wife for virtually single handedly managing entire house matters. She did this job very well and now my children are well placed in their lives. My grandchildren are also doing very well in their academic, sport and extracurricular field.

A Memory from College Days

Studies in NITRR being very engaging, most of my time was going in studies only.
Bicycle was my mode of transport for going to college and to city. In the evening virtually every working day I used to go and meet my batchmates. This was my only pass time in those days.
In school I used to play badminton and table tennis. Used to take part in various tournaments. After joining NITTR due to study pressure my sports and other activities were reduced.

Professional Journey

I worked as Associate Prof at N I T Raipur. I served the institute in several capacities including:
1. Head of the dept , Met Engg.
2. Dean, Students Welfare
3. Dean, Faculty Welfare

Family

My wife retired as a Lecturer and Vice Principal at Gujrati School, Raipur. We have 2 sons. One in U S A. and one in Bangalore. Both of them are working as Software Engineers in multinational corporations.

A Memory from College Days

I consider myself very fortunate to have worked as Professor and Dean at the same institute (then GCET Raipur, now NIT Raipur) where I graduated from with a B.E. degree. Further, during my tenure as Professor at NIT Raipur, I was also the hostel warden for the same hostel that I had visited as a student to study with my fellow batch mates. After my retirement, I feel proud to have served this prestigious institute that has been a major part of my life and achievement.

Professional Journey

I began my professional career with Bhilai Steel Plant, where I gained valuable hands-on experience and developed a strong understanding of industrial operations, plant processes, safety practices, and workplace management. Subsequently, I worked with BRP at present as Director at GIOXIS Works OPC Pvt. Ltd., Bhilai, Chhattisgarh.

Family

I am blessed with a well-educated and professionally accomplished family. My son, Vaibhav A. Marathey, holds a B.Tech. in Electronics & Telecommunication Engineering (E&TC) and is currently working as a Senior Manager in the Transmission Circuit division in Pune. His wife, Shweta Marathey(Shweta Wagh) is a B.Tech. graduate in Information Technology and a Gold Medalist from NIT Raipur. She is also an alumanai of NIT Raipur and has built a successful career as a Senior Software Engineer at Broadcom, Pune.

My daughter, Dr. Priyanka Marathey, holds a B.Tech. in Electronics & Telecommunication Engineering (E&TC), an M.Tech. in Energy Management Systems, with a specialization and research focus on Solar Energy, and a Ph.D. in Electronics Engineering and Materials Science. She is currently working as a Senior Project Manager at College of Engineering Pune (COEP) Technological University, where she is involved in academic, technical, and research-oriented projects. We take great pride in the educational achievements and professional accomplishments of our children and their commitment to engineering, technology, research, and innovation.

A Memory from College Days

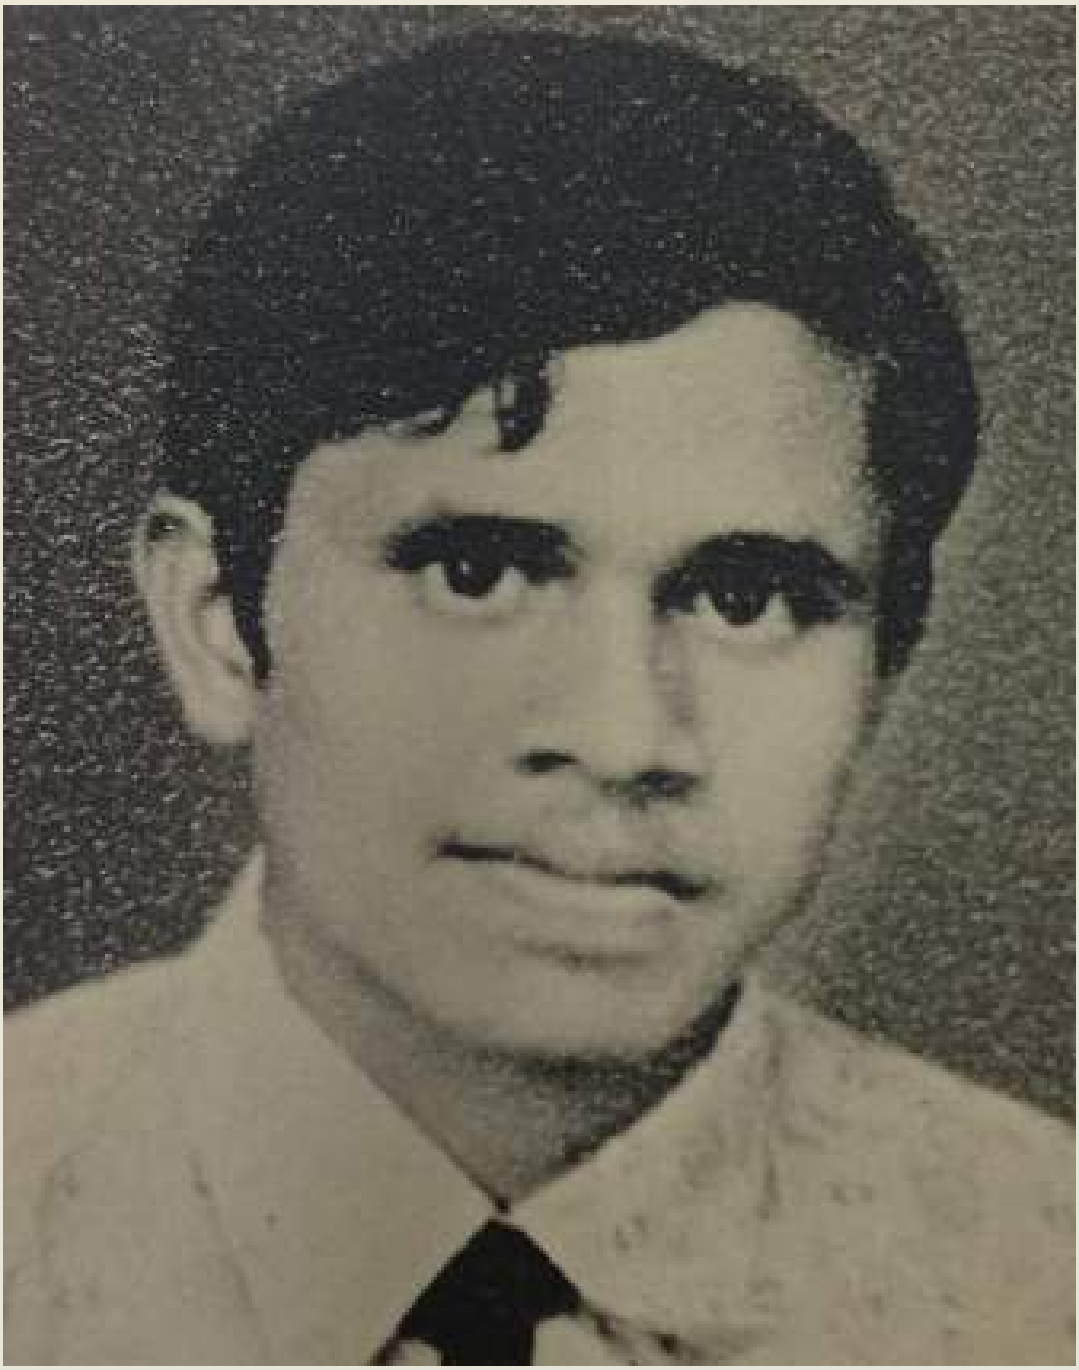

I fondly remember our wonderful college days when we used to gather in our room with our dear friend Bhattacharya and many other friends. We would all come together, especially in Umesh Chitalangia's room, where we enjoyed memorable music sessions and informal mehfils. Those evenings were filled with music, laughter, friendship, and countless joyful moments. We had very little in terms of material things, but we had the priceless company of good friends and the freedom to enjoy every moment together. Looking back,

A Memory from College Days · continued

those simple and beautiful days remain some of the most cherished memories of my life. The friendships we made and the moments we shared during those college days will always hold a special place in our hearts.

Professional Journey

After passing out engineering in 1976, I started looking after the family run tyre trading business in 1980. For a short stint in the year 1982 I Started working in a Dam Project in MP. I ventured into manufacturing and started Jai Bajrang Cement in 1986. In parallel, we started a Ferro Alloys Plant in 1988 in Urla Industrial Estate, Chhattisgarh. And in 1977, the foundation for first 350 tpd sponge iron plant with 10MW Power plant was laid and there the Journey of our parent company Godawari Power and Ispat Limited started. Today we are a steel conglomerate of Central India with mining, pellet, sponge, billet, wire rod, renewable energy, real estate businesses under our wings. The Group stands at a consolidated top line of over 6000 crore with a market cap of about 15000 crore.

Family

I am a strong believer of Sanyukt Parivar. Even today, after so many decades, our joint family is intact. At least once a year, the entire family — children, elders, everyone — sits together." Family governance in the HIRA Group was never a formal boardroom framework. It was something far older, deeper, and rooted in tradition. It was built on shared meals, shared festivals, and shared responsibilities. I created our first unit—built entirely on instinct, courage, and the quiet assurance that my family stood behind him. Today the second and third generation have taken up the responsibility of taking the group to new heights and I observe, intervene if there is any major concern and act as advisor. For new business we still sit together as family, discuss all pros and cons and then decide whether to take it forward or not. Being it a new business, expansion, capex, we all brainstorm and get to a conclusion.

A Memory from College Days

Engineering friendships have their own current—once the circuit connects, it never breaks. Sharp minds, sharing the same branch, sharing the same benches, and often the same trouble. We were like conspirators in curiosity. The group of 3-4 friends, the friendship which started as laughter over chai at the campus gumti

Family

I married Gopa in 1985. She holds master's and B.Ed. degrees and worked as a lecturer in New Mumbai after our marriage. She later left teaching to focus on caring for our family as a homemaker. We have two children, Pramit and Prapti; both are engineers with master's degrees. Pramit joined the DAE unit and worked for 10 years. He later moved to Europe to work in Maynooth. Presently, he is employed in a multinational company to work in ML and AI based applications. After completing B.Tech., Prapti moved to USA and earned her MS from NC State University. She joined Advanced Micro Devices (AMD) as an MTS Silicon Design Engineer and is now settled in California. Both are married.

A Memory from College Days

Due to urgent work, my father did not accompany me the day of admission to our college. There were number of forms that were to be filled where parent/guardian signatures were required. I signed all the forms on behalf of my father. Everywhere it worked, except NCC. After seeing my form, Dave sir asked me, 'Kiska signature Hai'. I said, 'Father kaa'. Then he asked, 'Kisne kia'. I said 'maine'. He said, 'Abhi tak college mein admission bhi nahin liya aur badmashee chalu. Jao kisi guardian ka signature leke aao'. Thanks God, parent of another student agreed to sign my form, and I could get admission in our beloved college.

States. Tushar graduated in Electrical Engineering from NIT Bhopal, completed an MBA in Finance in the United States, and is married; he and his wife work as senior managers in multinational companies. Rahul graduated in Computer Engineering and worked as a software engineer at Tech Mahindra. In 2023, he passed away after a serious illness.
Jyoti and I have settled in Mumbai. Gauri and Tushar live in the United States.

A Memory from College Days

My college days were difficult because of my family's financial condition. It was hard to meet even the basic expenses of books and living. Still, I remained simple, decent, and friendly with everyone, and my friends were very supportive.
I remember one time in my second year when I appeared for my examinations after going hungry for two days. One of my college friends knew my situation. He took me to his hostel mess, introduced me to the mess manager, and bore my food expenses for the remaining days of the exams.
Those difficult days actually shaped me and helped me lead a successful and contented life.

A Memory from College Days

In early days of 2nd year, I was days-scholar from Durg to Raipur. Once I missed the train for Raipur and went Raipur by bus. That day it was lucky for me, as that very day, there was a Magisterial checking in the train. All were caught by Magistrate because mostly we were travelling without tickets and I was the lucky one to escape.

Professional Journey

A distinguished Civil Engineer with nearly five decades of rich and diverse experience in government service, large-scale project execution, and successful entrepreneurship.

Graduated with a Bachelor of Engineering (Civil) in 1976, commenced professional career with the Department of Irrigation, Government of Madhya Pradesh, gaining foundational experience in large-scale infrastructure and water resource management.

Subsequently, served as a Junior Engineer with the Central Public Works Department (CPWD) from October 1977 to April 1978, involved in central government construction projects adhering to stringent quality and compliance standards. Further served as a Grade-I Civil Engineer with the Military Engineer Services (MES) from April 1978 to October 1978, contributing to critical defence infrastructure projects.

From 1978 to 1984, held the pivotal position of Project Engineer at the prestigious National Dairy Development Board (NDDB). During this six-year tenure, successfully conceptualized and executed several landmark dairy projects across India, including Mehsana, Ahmedabad, Indore, Ujjain, and Gwalior, demonstrating exceptional project management and leadership capabilities.

In 1985, driven by an entrepreneurial vision, transitioned from public service to private enterprise and established a plastic manufacturing unit, which was successfully operated and scaled.

Building on this success, in 2002, strategically diversified and expanded into high-potential sectors including specialty chemicals, refractory materials, and steel fabrication. Today, under the banner of SATGURU REFRACTORIES, the enterprise leverages 40 years of entrepreneurial expertise and deep-rooted industry relationships, ensuring strong business continuity, technical competence, and financial prudence.

Family

I am blessed with a close-knit, educated and supportive family, which is my biggest strength in both life and business.

My wife, Mrs. Nutan Gandhok, is not just my life partner but also my business partner. She co-owns Satguru Refractories and has been the pillar of our 40-year entrepreneurial journey.

Our elder son, Vinay, is a BE in Computer Science and MBA in Marketing. He is well-settled in Singapore

Family · continued

along with his wife Vaishali, and brings us global exposure and modern business insights.
Our younger son, Varun, is a BE in IT and is the driving force behind our current business operations. He efficiently manages day-to-day activities, technology and expansion, ensuring business continuity.
His wife, my younger daughter-in-law Anjali, is highly qualified with MCom and MCA degrees and is passionately pursuing a career in teaching.
Together, we are a family of professionals with strong values, combining experience, technology and education to take our family business forward.

Professional Journey

I began my career in July 1976 with Gannon Dunkerley & Co. Ltd. (GDC), a professionally managed company of repute specializing in civil and structural works including water & sewage treatment plants, overhead water tanks and chimneys.

During my 30-year tenure with GDC, I worked as Project In-charge on many prestigious projects across India and abroad. Key projects include the 10 Cold Store Project in Iraq, Second Launch Pad for ISRO at Sriharikota, Chennai International Airport, Akash & Agni Missile Projects at Hyderabad, 2x210 MW Power Plant in Bihar and 3x500 MW NTPC Plant at Korba. I was also involved in construction of numerous cement plants, textile mills, pharmaceutical and automobile plants.

From 1995, I served as General Manager-in-charge of Hyderabad and Mumbai Regional Offices, both operating as independent profit centres.

I took early retirement from GDC in 2006 to start my own venture. The initial assignments were civil works for an 80 MW Power Plant for Hindustan Zinc Ltd. at Chittorgarh, a 400 kV Sub-station at Merta and civil & structural works for Uttam Galva Metallics at Wardha.

We undertake works pan-India and have executed projects in Maharashtra, Andhra Pradesh, Madhya Pradesh, Jharkhand, Karnataka and Gujarat. Since inception, the company has consistently attracted sufficient talent to achieve its targeted turnover and revenue. The company is healthy and maintains adequate resources, with a large team of technical, managerial staff and skilled workers engaged across sites to match the requirements.

The journey has been challenging, adventurous and thoroughly enjoyable. I plan to retire at 75 years of age.

Family

I met my wife Kiran at a family function in Gwalior in June 1982. A science graduate, she is quiet, amiable and very observant. She enjoys knitting and cooking. We married in June 1983.

We have two children.

Siddharth Muley: Elder son, Engineer & MBA. After stints with UBS Bank and Gammon Infra, he now manages our construction business. He is married to Komal Kothavale Muley — MBA, Certified Career

Family · continued

Analyst and founder of _Better You_ (bestseller book summary platform) and _Career Code_ (career support platform).
Dr Sonal Muley Pande: Daughter, Ophthalmologist — MBBS, MS. Married to Dr Nikhil Pande — Oncologist, MD & DM from Tata Memorial Centre, Mumbai. Both are settled in Launceston, Tasmania, Australia.
We are a simple family who loves travelling, good food and trekking in hills and forests. Our favourite place is McLeod Ganj, HP.

A Memory from College Days

My five years of engineering in the hostel were the golden years of my life.
It was a world in itself- a small shared room, common bathrooms ever debated mess food & friendships for a lifetime.
My close circle- Pawan, Umesh, Guha, Pinaki & many more- we were like brothers. Long late night discussions with endless chai - there was a funny incident every day.
Hostel taught me much more than engineering. It taught me sharing, adjusting, managing within limited pocket money & standing by friends.
Even after 50 years, when we meet, we become same 20-year olds again.

Professional Journey

After passing engineering graduate ,I joined in private construction company Chopra Construction Co. I worked there for about one year as a Construction Engineer for machine foundation construction , levelling work, material management, Column and beam construction etc.
I applied for government job and selected in SAIL and joined and posted at Rourkela steel plant Orissa, India as a Management trainee . After one year training in different departments, I was posted in Traffic and Raw materials Department. I learned there about laying of railways rails, maintenance of rails, rails management etc. Then I was posted in construction Department. I constructed residential houses for the employees of Rourkela steel plant, office building etc. Then, I was posted in Barsua mines, Tensa mines, Kalta mines of Rourkela steel plant as an in charge of mines construction department. I constructed residential houses for the employees of mines of Rourkela steel plant, office buildings, I completed a project for Laying of drinking water supply line of 200 mm diameter of MS pipe about ten kilometers long and with 600 meters altitude which included construction of intake well in river, water treatment plant, drinking water reservoir having booster pumps for climbing the water for the Tensa township and offices . This project was completed within stipulated time, and I received appreciation from managing director of Rourkela steel plant. I constructed approach road to mines, culverts etc.
Then , after getting promotion of divisional Engineer,I got transferred from mines and posted in design department Rourkela steel plant as design engineer. I completed so many design for columns, beams ,slabs etc. After that, I got transferred from Rourkela steel plant to Bhilai steel plant and posted as divisional Engineer in Town Engineering Department for construction of residential houses as being funded by HUDCO. I constructed HIG houses ,MIG Houses and handed over the same to the individuals , I did maintenance of residential and office buildings , construction of roads, maintenance of sewerage treatment

Professional Journey · continued

plant , laying of sewer lines. Etc.
After that I was posted in Construction Department, and I did so many small and big projects e.g. Renovation of blast furnace, Renovation of power plant , construction of electrical gallery for power plant , construction of weigh bridges on railway lines of Bhilai steel plant, construction of office building, machine foundations , Construction of roads, laying of railway lines. Administration of projects etc.
I retired as Chief Engineer from Bhilai steel plant. After that I joined a private educational institution and posted as Head of Department of Civil Engineering. There l taught the civil engineering students from first year to final year students. I was there about 9 years and gave good results every year.
Lastly, I am with social associations and organizations and doing the social activities and will continue.....

A Memory from College Days

1. I was from Bhilai and more students were from Bhilai. We Bhilaians came every Saturday from college hostel to Bhilai. On Saturday only one time food was used to prepare at noon only. Every Saturday, there was half day in college. On one Saturday ,during the meal some students got competition that who will eat more poori. So , many students started eating. Cook was surprised to see that. At last, three students ate a big amount of poories. The student who became first , ate 50 poories, second ate 45 poories, and third was me ate 35 poories. Second day, our stomachs became upset, and we were in pain. So that was a memorial moment for all of us.

2. We Bhilaians used to go on Monday from Bhilai to Raipur, to our college by train. The train time was at 8.45am starting from Durg station and reaching Raipur station at 9.45 am. All students generally used that train. One Monday, there was a magistrate checking. All the students climbed up the train. Nobody knew about magistrate checking. Most of the students were without ticket. So , between Kumhari station and Raipur, many students were caught by railway Authority. They were taken to the court in police van. The magistrate saw all the students and asked some questions and freed them by giving warnings not to do this in future. That day , those students could not attend the college. This was a very Memorial Day for them. Those days were students' days. Really, the student's life was a unique life.

During recent Aditi's visit to Raipur, the whole family gathered to have a wonderful Nani House time

Photo was taken in the final year in college along with teachers and Batch mates a loving memory

Photo taken of me and Suman just after marriage

Movie Buff Extraordinaire - Rajkumar Jaggi

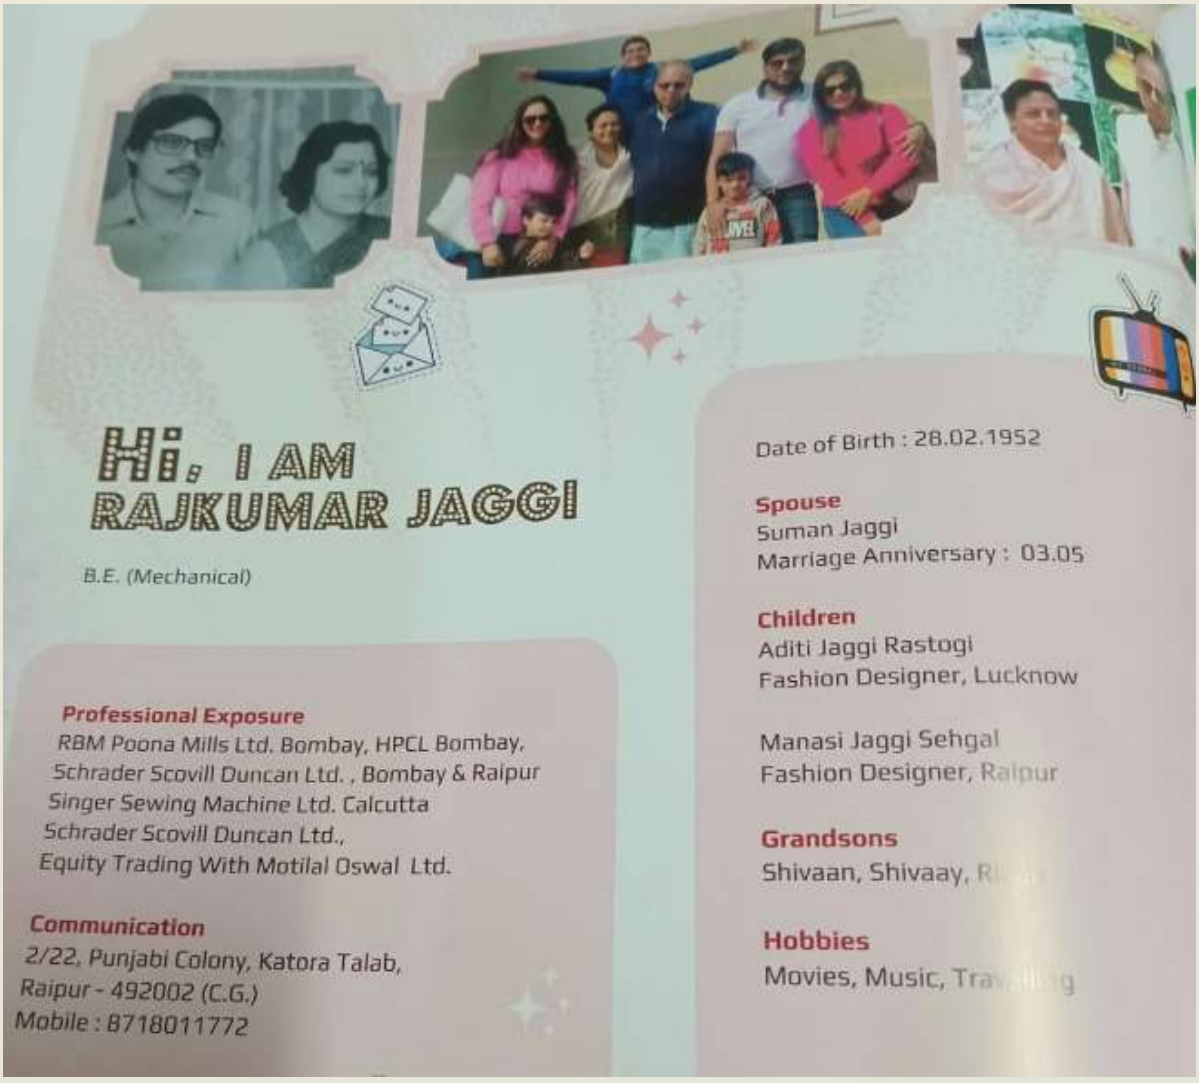

Most of us in the OML group know about Raj's interest in watching movies. The data I received from him about the movies he has watched in his life till now is truly mind boggling. He has till now watched 17825 foreign films ! Which include besides English, films of almost all Major European and Asian languages.

He has watched 2270 Hindi movies and around 270 regional movies (Assamese, Bengali, Gujrati, Kannada, Mayalam, Tamil, Telugu, Marathi, Punjabi, Oriya, Manipuri, Sanskrit, Chhatisgarhi, Arunachal and Ladakhi. Also 5 Pakistani movies and 23 Hindi plays.

So he has watched overall around 20000 movies and some of them more than once.

He has been maintaining record of movies in Excel sheets. The Excel data is not limited to just name of the movie. The data includes besides the name of the movie, Release year, View year, theatre name or OTT Channel/TV Channel name, Names of : Actors (Hero, Heroin, Villain/Vamp, comedian, Supporting actors, guest actor), Music Director, Country (in case of foreign film), rating and grade. Also year of death of Actor or director and his age.

Assuming average movie time as 2 hours, he has spent 40000 hours in movie watching (in a year there are only 8760 hours). Mind boggling indeed !

Professional Journey

After passing B. E. in chemical engineering, I got involved in various activities for job initiative. Then I joined Resinate chemical plant in 1979 at industrial state in Bhilai. In 1983 I joined Bhilai Refractories Plant in Bhilai. Now it is Sail Refractories Unit , a Sail Unit. I retired from there in 2015 February.

Family

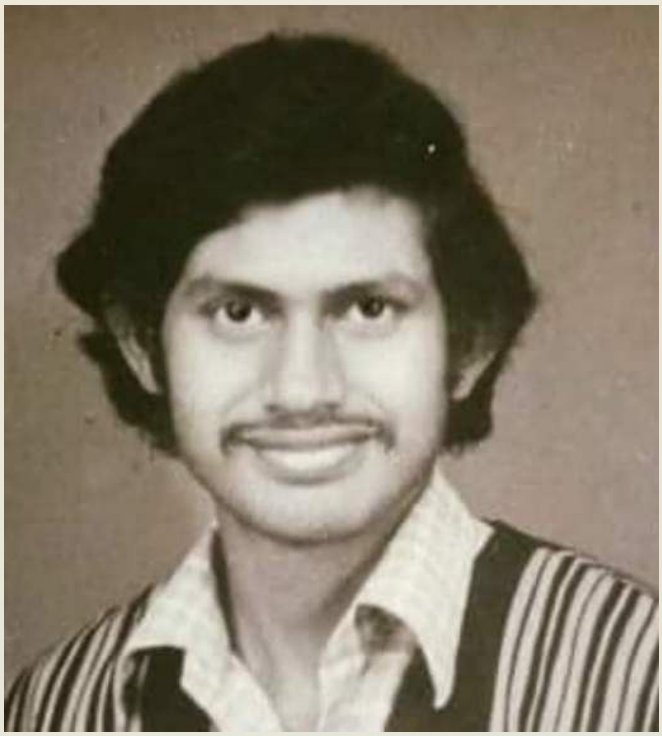

I have a small family, me , my wife my daughter. My wife is a housewife. My daughter after passing M A in history from Delhi, and she joined other courses in Delhi.

A Memory from College Days

I could remember many things . Maniram canteen near the Ayurvedic College . We used to go there every evening after college and end for evening snacks . Every Saturday we used to go to the railway station to go to Bhilai by the pave of the railway line side that was a very amazing experience . Often, we rent bicycles near the bicycle shop to go to the city. One day when I was returning to the hostel, I slipped on the road and fell down. I was lucky at that time road was empty. I could not forget the incident till today.

Professional Journey

My professional journey spans nearly 46 years encompassing challenging assignments in Hydropower, Engineering Design, Industrial Projects ,Highways and in Real Estate.
I began my career with NHPC where for 4 years I was associated with the Construction of Head Race Tunnel for a Hydropower Prohect in Manipur employing New Austrian Tunnelling Method (NATM) ,being used in India for First time working through extremely soft clayey and gassy strata in association with Austrian and German Consultants. It was very demanding and enriching Engineering experience.

I subsequently joined Cement Corporation of India (CCI) , spending 7 years in its Design office and progressing from Senior Engineer and then Dy Manager level.
My next 5 years were with RITES ,where I worked as Project-in-Charge in the rank of DGM, where I handled Coal Transportation System for Super Thermal Power Project .
Next 10 years were spent in MECON in Project Management Consultancy for Major Industrial Projects besides gaining experience in Contract Management.
I opted for early retirement as Additional General Manager (AGM) for a tryst with Private Sector.

Thereafter I spent 5 years as Project-in-Charge from Executing Contractors side working on major Highway Projects of NHAI in Bihar, Assam and Rajasthan.
After shifting to Lucknow, I spent nearly 15years overseeing Construction of High Rise Towers up to 25 stories at Senior Level in Real Estate Sector.
I retired as Senior Vice President of a leading Delhi based PMC and Infrastructure Consultancy Company.

Professional Journey · continued

Post retirement I did a few Consultancy assignment in Hospitality sector and also served in Expert Committee examining failures of some Highway Projects.

Family

I got married to Kakoli in 1991and together we have built a happy and close knit family. Kakoli is a Postgraduate in English with B.Ed. and was a Senior Lecturer at La Mariniere Girls College (LMGC) Lucknow.

A gifted orator and keen enthusiast of Debates, she has always been a wonderful companion, whose charming personality has added warmth and joy in our journey together. She is also associated with ISC evaluation committee as a Team Leader for English.

Our only child our daughter is an Engineer and MBA working with a US based Multinational in Healthcare and Pharmaceutical Consultancy in Gurgaon.

Our Son in Law also an Engineer and MBA is working for one of the big Four in Management Consultancy Company in Gurgaon. We are blessed with a happy, loving and close knit family.

A Memory from College Days

My college days remain among my fondest memories. On the very day of admission, I had my first taste of college life when Seniors of 4th year ragged us but with a light banter in College Canteen.

Facilities at Hostel was very basic with rather shabby toilets but the camaraderie made up for everything. We were fortunate to have some excellent and caring teachers like Prof Pilliwar and Prof Vachchani. Prof Pilliwar nicknamed me as " Bachcha". Mass bunking of Classes was quite in fashion till 3rd year to watch Block Busters of that era.

Looking back those simple moments of friendship, mischief, learning and adventure remain unforgettable.

Professional Journey

After passing out college selected to self-business using the knowledge acquired in college. Select a less traveled field e.g. Recovery of valuable chemicals from factory waste. First started with Bhilai steel plant coal chemical waste. Work around 6 years with this. Meanwhile I came across waste from petroleum crude oil tank bottom Started working on that with ONGC Uran. Recovered a valuable product Micro crystalline wax. Which was raw material for cable jelly and being imported We have substitute that with our product We were supplying this product to almost all large cable jelly manufacturer For almost twenty years we were on this field. Due various safty norms we started looking new field. Then we came across waste from edible oil refinary. Which was a major pollution problem for them. We started making lubricants for PVC pipe extrusion Out of this waste we further develop Biofuel and marketing that a substitute for LDO for road making. Which has more calorific value than fossil fuel. I was deeply involved in social services. Worked with Viswa Hindu Parishad in various assignments for about 30 years Just relieved from Post of State President VHP. Chhattisgarh. I am strong believer in Bhartiya Sanskriti and like travelling and traveled entire Bharat and most part of world.

Family

Married Usha in 1980. She is from Indore I have two children one daughter Shivangi and son Aditya Shivangi is electrical Chandelier designer and manufacturer live in Mumbai. She is very well established in industry. Aditya is working with me. And taking over the charge of business and responsibility. I have two grandson Prithvi and Agustya. My daughter has two kids, Abhiraj and Shikha. I'm from large family that is well settled in Chhattisgarh in various cities. My residence is at Malviya Nagar Durg.

A Memory from College Days

Initially I was not in Hostel. Doing up and down from city. I was not good in English, so classes were difficult for me as there was no English in village school. With friends' help I could overcome the problem. Then in the final year, I joined Hostel life. I came across lot of other personalities. Since last ten years, we

Professional Journey

I am the Founder & Chairman of Polybond Group of Industries (C.G) and the Founder of Polybond Insulation Pvt. Ltd. Bhilai, established in 1995. The company specializes in the manufacture of Mineral/Rock/Stone Wool insulation products and solutions for Steel, Power, Refinery, Fertilizer, and other industrial sectors.

I am also associated with FairFlux Pvt. Ltd., a company engaged in the manufacture and supply of metallurgical products. And appreciated as best quality, ancillary unit to SAIL in year 2002.

My professional journey has been driven by a commitment to engineering excellence, innovation, and industrial development. I have contributed to collaborative innovation initiatives with CSIR and Tata Steel, particularly in the field of sustainable iron-making technology using industrial waste.

I was honoured with the "Engineer of the Year Award" – 2023 (Chhattisgarh State) in recognition of my contribution to the engineering and industrial sector.

Leadership & Social Contributions:
Founder & Chairman – Polybond Group of Industries, Rajnandgaon.
President – GEC–NIT Alumni Association, Raipur.
Past Chairman – CII, Chhattisgarh, state council.
Past President – Student Welfare Committee, GEC Raipur.(1975)
Past President – Rotaract Club of GEC Raipur (1976).
President – VWF Goshala at Rajnandgaon.
Engineer of the Year Award – 2023 (Chhattisgarh State).

Professional Journey · continued

Actively involved in industry development, engineering innovation, alumni activities, education, social welfare, and community initiatives.

Family

* We are blessed with a son and a daughter. Our son Rahul and his wife Rachana are settled in Bhilai with us, while my daughter Ruchi and her husband Tanmay are settled in Noida. We are also blessed with four grandsons, who bring immense joy and happiness to our family.

* Belongs to Freedom fighter Family
* One road “CHITLANGIA MARG” in RAJNANDGAON (C.G) is named in the memory of Grandfather with statue.

A Memory from College Days

My journey with GEC/NIT Raipur began in 1971–72 as a first-year Engineering student. I proudly cleared all my subjects in the first year, writing my answer papers in Hindi, and those early college days became some of the most memorable years of my life.

Our hostel room was often filled with 8–10 friends, and we had turned it into our own little “Music Company,” with singers and instrumentalists. We were always ready for the Hostel Day and College Gathering—music, friendship and enthusiasm were part of our everyday life.

The college gave me not only engineering education and practical learning, but also lifelong values of, teamwork, social involvement and participation in various social programs, along with friendships in the life till today.

In my fourth year, I was chosen to take up the responsibility of President of the Students’ Union. During the period when the Emergency was declared, our Principal, Shri Deshpandey, called me and seriously advised me that, officially, I should introduce myself as the President of the Students’ Welfare Committee. This was another memorable chapter of my college life and gave me valuable experience in leadership, responsibility and working with students and the college administration.

After more than five decades, I feel immense pride and gratitude to remain connected with all friends, and also as the President of the GEC–NIT Alumni Association.

GEC/NIT Raipur is not just where I studied—it is where my professional journey, leadership experience, lifelong friendships and many cherished memories began.

A Memory from College Days

Fifty years on, Raipur batch feels like a prototype that somehow never crashed. Recalling those old days in hindsight seems like taking a trip down memory lane. 50 years back we arrived in college as a nervous boys from small towns, left as hopeful graduates and discovered that real syllabus is only 1% Cabon and 99% chaos. I may not remember all faces now but our shared moments of camaraderie, hanging out, and safety net it provided still fills me with glowing warmth and evokes sweet memories. Not having enough money to pay for movie cycle stand, cutting tea at Netaji Hotel, hopping from one friend's place to another, doing homework together have all made them stuff of folklore. Our dedicated teachers like Dr Kamth, Professor Telang ,Professor Pillai ,Professor Ghatge, thank you for laying the foundation, shaping us what we are today. Thank you, all our batch mates, for making those ordinary days extraordinary and unforgettable.

Family

My wife Mrs Rekha Degan also had a long teaching experience of Computer Science in various schools and colleges at Bhilai.
We have two children, daughter Anika did Engineering in Electrical from BIT Durg then MBA from US , happily married , staying in US for about 16 years returned to India and now at Pune working with Logistics group.
Son Ankit did Engineering from MIT Pune in Electronic and telecommunications and MBA from Canada. He is also married and after being in Canada for 4 years returned to India and now at Pune working in health sector.

A Memory from College Days

In first year a young and energetic Mr Ghatage taught us Engineering drawing. In very first class he gave us a long list of instruments and things to procure, being very sincere students, many of us bought all the items but more than 50% of which were never used.

A Memory from College Days · continued

After many years I met him during a train journey, and we had good time chatting over his long list .

Years pass. *Friendship remains.*

To the classmates, families and memories that made this journey extraordinary.
